

Things you can do with Visual Safeguard

| YOU CAN | WHAT | | WHEN | TO WHOM |
|---------------|-----------------------------|-----------------------------|---------------------------|---------------------|
| BACKUP | Passwords | MasterKeys | Now | Myself! |
| SHARE | ID Documents | Medical report | Preparing for a trip | My family |
| | Seed phrases | Deeds | | My friends |
| SEND | Commercial offerings | Customer's sensitive report | Before things go south | My boss & coworkers |
| CREATE | Your Disaster Recovery Plan | Farewell message | Before the aliens take me | My state manager |

Protect your critical data... and many things! ➔

SECRETS VAULT PLAYBOOK

Things you can do with Visual Safeguard 

BACKUP

Safeguard your most valuable information with an image

An image acts as a **visual key** to protect your information, ensuring complete security and seamless recovery whenever you need it. **Only you can access what's inside.** We can't see it. Your info, aka secrets, stay yours.

SHARE

Give access to your sensitive information to trusted parties

Share encrypted secrets with full confidence. Choose **what to share** and **who can access it**. Whether it's a seed phrase or a sensitive document, **you control** who sees it and when.

SEND

Deliver private and confidential data securely

Send critical information directly to one or more recipients. **We never see your data—only you and your recipients have access.** **Avoid** sending reports, commercial offers, or personal details through **insecure email channels**.

CREATE

Build private messages and instructions from within the vault

Use the built-in space to write or record love letters, private instructions, or farewell messages. And then decide if, when, and to whom they're revealed.

SECRETS VAULT PLAYBOOK

Examples of **what** you can safeguard, share, send & create:

Passwords

ID Documents

Master Keys

Medical report

Seed phrases

API Keys

Audio messages

Visa

ID Cards

Certificates

Instructions
(video, audio...)
